

R Portable Filtration System

The Perfect choice for batch processing, or filtering from tanks or drums

This cart-mounted filter system has a diaphragm pump, pneumatic components and valves. The housing itself uses a standard size 12 bag. The clamp cover is easily removed and helps to reduce the time spent cleaning or replacing the bag. Rosedale's superior side-entry design does not allow contaminant by pass around the filter bag nor fluid to impinge the filter bag. It also prevents the spills and messes caused when opening. So for efficient, clean filtration, Rosedale is your choice.
